- UI / UX Design

LANGUAGES

- Arabic: Native
  (Bilingual proficiency)

- English
  (Professional working proficiency)

MILITARY STATUS

- Finished 09/2022 - 09/2023

PERSONAL PROJECTS

- **SpecCave (11/2022 - PRESENT)**

  - A full application for all computer hardware components. Users can build a full PC with our extensive library of parts, search for any part they want, and ask questions and get answers in the community section. There is also a part for comparing parts.
  - **Features:**
    1. Extensive library of computer hardware components.
    2. Ability to build a full PC.
    3. Search for any part.
    4. Ask questions and get answers in the community section.
       Compare parts.
  - **Accomplishments:**
    1. Used APIs to fetch data on computer hardware components.
    2. Developed a database-driven community section for users to ask questions and get answers.
    3. Expanded the app to include an e-commerce section for selling used parts between users.
    4. Implemented a search feature that allows users to find specific parts quickly and easily.

- **WeatherNow (09/2022 - 10/2022)**

  - A full application for all computer hardware components. Users can build a full PC with our extensive library of parts, search for any part they want, and ask questions and get answers in the community section. There is also a part for comparing parts.
  - **Features:**
    1. Displays the current weather conditions, including temperature, humidity, wind speed, and precipitation.
    2. Allows users to search for weather conditions in any location.
  - **Accomplishments:**
    1. Used the OpenWeatherMap API to fetch weather data.
    2. I asked for users permission to access user device location.
    3. Implemented a beautiful and intuitive UI.

- **Todoey (08/2022 - 09/2022)**

  - A todo list app that allows users to save tasks and track their progress. The app uses Provider state management to keep track of the tasks and their status.
  - **Features:**
    1. Add, edit, and delete tasks.
    2. Mark tasks as complete.
  - **Accomplishments:**
    1. Used Provider state management to keep track of the tasks and their status.
    2. Implemented a beautiful and intuitive UI.
